Each license includes a complementary license for Professional Edition of Prosys OPC UA Simulation Server, enabling full use of the Import OPC UA Information Models feature.

Volume discounts are available when all licenses are purchased at the same time. Prices for more than 5 developer licenses, product licenses or site licenses are available on request.

SDKs are licensed as developer licenses. This means that each developer needs his own license, but no runtime licenses are required. Please read license agreement for details.

All product licenses include Maintenance Package for the first year. You are recommended to reorder Maintenance Package before the expiry date. If you reorder Maintenance Package after the expiry date, that expiry date will be considered as the start date of the reordered Maintenance Package. Maintenance Package includes one year of upgrades to all new releases and fixes of the product, and email based support. For those needing more help we offer professional services according to separate agreements.

All prices in USD.
